

Salvador Fuentes Jr.

Senior Software Engineer

Irvine, CA | [linkedin.com/in/fuentesjr](https://www.linkedin.com/in/fuentesjr) | fuentesjr.dev | fuentesjr@gmail.com

Senior software engineer with 15+ years of experience building and operating backend platforms for high-growth technology companies. Deep expertise in billing systems, subscriptions, distributed services, observability, and production incident response. Proven record of shipping revenue-impacting features, improving platform reliability, and cross-functional delivery. Currently expanding into Agentic Engineering workflows and Go.

KEY HIGHLIGHTS

- Drove billing delivery for GitHub Copilot for Individuals, a product that reached **\$10M ARR within months** of launch.
 - Architected Zuora Orders API migration, de-risking the billing roadmap for GitHub's monetization platform.
 - Extended billing database cluster capacity by **8 months** through strategic deprecation of legacy MySQL tables.
 - Shipped billing features across Copilot, GitHub Advanced Security, enterprise marketplace, and mobile in-app purchases.
-

TECHNICAL SKILLS

Languages:	Ruby, JavaScript, Go
Frameworks:	Ruby on Rails, RSpec, React, ViewComponent, Primer, Catalyst
Data & Messaging:	MySQL, Postgres, Redis, Kafka, Memcached, Trino
Observability:	Datadog, Sentry, New Relic, SLOs
Tools:	Git, GitHub, Sorbet, Packwerk, Twirp, CircleCI, GitHub Actions, Docker, Apache Mesos
Exploring:	Agentic Engineering — context management, tool orchestration (Claude Code, OpenAI Codex)

PROFESSIONAL EXPERIENCE

Senior Software Engineer | GitHub

Remote (Irvine, CA) | July 2021 – July 2025

- Delivered billing capabilities for major monetization initiatives including Copilot for Individuals, GitHub Advanced Security, enterprise self-serve marketplace subscriptions, and mobile in-app purchases.
- Drove Copilot for Individuals launch by building billing interfaces and resolving complex support issues for a product that reached \$10M ARR within months.
- Owned Zuora Orders API migration foundational work, reducing delivery risk for the entire billing roadmap.
- Led deprecation of legacy MySQL billing tables, extending database cluster capacity by 8 months and improving platform sustainability.
- Strengthened reliability through currency conversion resiliency, webhook failure investigations, enterprise downgrade fixes, and CI stability improvements.
- Built Datadog monitors, dashboards, and SLOs; served as first responder during a production billing incident to restore customer access.
- Partnered with Growth, Sponsors, Data, Databases, Mobile, and Security teams; onboarded teammates and contributed accessibility fixes.

Senior Rails Engineer | Brookstone Capital Management

Costa Mesa, CA | May 2019 – July 2021

- Supported flagship financial advisor products and built internal workflow tooling for advisor services across multiple engineering teams.
- Initiated development of a consumer-facing lead generation product for the marketing team.
- Strengthened application security with JWTs, CSPs, Brakeman audits, and dependency updates; built internal gems to decouple shared concerns.

- Designed CI/CD pipelines with CircleCI and GitHub Actions; introduced New Relic APM to diagnose database bottlenecks.
- Mentored engineers and formalized architecture decision records, testing standards, and security best practices.

Senior Software Engineer | YP (formerly AT&T Interactive)

Glendale, CA | January 2011 – June 2018

- Served as technical lead for the consumer tools team, building internal tools and prototypes that reached production.
- Reduced onboarding time by packaging tools and applications in Docker containers; migrated workloads to Apache Mesos.
- Improved SEO through restructured XML sitemap generation and a new traffic-routing mechanism for the consumer site.
- Presented technical talks on Docker and V8 internals to 35+ engineers.

Backend Developer | 72andSunny

Los Angeles, CA | March 2010 – January 2011

- Built deployment automation, Sinatra backends, and server configuration scripts for Rails and PHP projects.
- Developed Rails backend for CKE Restaurants mobile apps; integrated with the Facebook Places API.

EARLIER EXPERIENCE

Software Engineer, iizuu inc. (Marina Del Rey, CA) | Software Developer, e7 Architecture Studio (Los Angeles, CA)

EDUCATION & CERTIFICATION

University of California, Davis — Computer Science (Data Structures, Algorithms, Programming Languages, Computer Architecture)

Cloudera Certified Developer for Apache Hadoop (CCDH)
